Vishwakarma Institute of Technology

BTech in Computer Engineering

Sept. 2025 – June 2029

Pune, Maharashtra

Projects

SafeRx  Live

April 2026

- Developed SafeRx, a healthcare web platform for detecting suspicious prescriptions and improving medication safety through digital verification and validation mechanisms.
- Built a workflow where users upload prescription details, which are analyzed to verify doctor/medicine information and identify inconsistencies or potentially fraudulent entries.
- Implemented secure authentication, database integration, and real-time validation features to improve healthcare transparency and reduce prescription fraud risks.

Hidden Path Explorer  Live

January 2026

- Developed HiddenPath Explorer, a travel and tourism web platform designed to help users discover hidden destinations, local attractions, and personalized travel experiences.
- Built an interactive workflow with real-time maps, location-based recommendations, event listings, and crowd insights for seamless trip exploration.
- Implemented secure authentication, dynamic content management, and live alerts to enhance user engagement and travel planning efficiency.

Coding Profile

LeetCode

contest rating: - - - -

leetcode.com/Aditya_0703

Strengths

Problem Solving

-Solving leetcode problems with consistency and learning the DSA concepts rigorously.

Team Leadership

-Leading a group towards a milestone is the thing which motivates me to grow and keep going.

Technical Skills

Languages: Python, C++, C, HTML/CSS, JavaScript

Developer Tools: Cursor, AntiGravity, My SQL, Figma, Git, Github, Vercel

Certifications

Infosys Springboard – February 2026

- Introduction to Artificial Intelligence
- Introduction to Deep Learning
- Introduction Natural Language Processing
- Artificial Intelligence Foundation Certification
